# Copy Trading

Copy-trading appeals to traders with limited trading experience or to those who don't have enough time to trade their own strategy. However, it can be useful to other trader groups as well. Even if you have an established strategy, you might want to use a mix or compare your strategy's performance with a copied strategy.

## TopFX cTrader Copy

cTrader enables you to copy tested trading strategies from other traders and be in full control of the whole copy trading procedure.

- ✓ Filter strategies according to Return on Investment, strategy age, strategy popularity, fees and copying capital.
- ✓ Enjoy complete transparency by viewing the full performance history of each strategy.
- ✓ Add or remove the allocated funds easily.
- ✓ Start and stop copying with the click of a button.
- ✓ Copy trade on your mobile, via the cTrader app for Android and iOS.

## TopFX MT4 PAMM

Your MT4 trading account gets connected to a Master account that manages multiple sub-accounts. Once the Master account opens a trading position, then this position will be mirrored in your account and all other sub-accounts. All the profits and losses of the Master account are proportionally allocated to the sub-accounts.

- ✓ Invest in your preferred PAMM account fast and easy
- ✓ Deposit and withdraw funds anytime you want
